

Notre Dame Research

Limited Submissions Competition

HHMI Gilliam Fellowships

<https://www.hhmi.org/science-education/programs/gilliam-fellowships-advanced-study>

Complete this information in a four (4) page maximum PDF document and return it to limited@nd.edu by 11:59 PM Eastern September 7, 2022.

Your completed application should include the following:

Advisor:

Name, department and title

Student:

Name, major and intended year of graduation

- 1) Please explain why you and your student should be selected for this opportunity (one page max).
- 2) Describe the student's project and how it relates to biomedicine (one page max).
- 3) Provide evidence that the thesis adviser has the interest, demonstrated ability, and commitment to (1) successfully develop the talents of students, including those from populations historically excluded from and underrepresented in science; and (2) facilitate change to foster a more inclusive academic scientific environment (one page max).
- 4) Have the student agree to sharing educational information as part of the application as described below (one-half page max):

I agree to share my name, major and intended year of graduation as part of an application to an internal competition for Notre Dame Research and understand that this educational information will be viewed by University of Notre Dame faculty and staff during 2022.

- 5) Have the student certify eligibility criteria below. The student does not have to identify HOW they meet the criteria for the internal application, just that they DO meet the criteria (one-half page max).

I meet the eligibility criteria for this competition:

"Prospective Fellows must be (i) U.S. citizens, U.S. permanent residents, undocumented childhood arrivals, or undocumented individuals who have been granted temporary permission to stay in the US (DACA)¹, and (ii) from populations excluded from and underrepresented in science because of ethnicity, race, or disability status, or alumni of the HHMI EXROP program, and (iii) be at the appropriate stage of their PhD training. International students are not eligible for this initiative. For this initiative, we define excluded ethnic or racial groups to be persons who identify as Black or African American, Latino/a or Hispanic American, American Indian, Native Hawaiian, Alaska Native, and from groups indigenous to the Pacific Island territories of the United States. Persons with disabilities— defined as those with a physical or mental impairment that substantially limits one or more major life activity—are also significantly underrepresented in U.S. science. The disability must be officially recognized by the institution's disability office and the student must be receiving services and/or accommodations from the institution for the disability. It is recognized that underrepresentation can vary from setting to setting. As such, individuals from racial or ethnic groups other than the groups listed above who can be convincingly demonstrated by the nominator to be historically marginalized or underrepresented at the graduate level may be considered. Nominations should be of students who (i) are in their second or third year of a PhD program, and/or (ii) have at least two full years of study remaining as of September 1, 2023."
