Purpose: The purpose of this NOFO is to grow a network of researchers that improves CDC's use of influenza modeling and forecasting to:

- Provide situational awareness.
- Inform the prevention and control of influenza.
- Advance the science of influenza forecasting and modeling.
- Increase communication of related results with key partners, including state, local, and non-governmental partners.

These efforts will inform strategies to mitigate influenza morbidity and mortality. This includes populations at higher risk of influenza or who have less uptake and access to influenza prevention and control measures.

Overview: By growing a network of researchers, CDC will be able to use the expertise of multiple influenza modeling and forecasting partners to provide the best possible evidence for influenza planning, preparedness, and response. You will be expected to establish and maintain a network site, a group of connected researchers that also connects with CDC's larger network.

Internal Application Requirements: Upload the following information to the Google Form at <https://forms.gle/WUySw41Hjn2b3RSe9> by the internal deadline:

- Name of the Principal Investigator (PI)
- Project Title
- All ND Collaborators:
 - For each ND Collaborator listed, include name, department or unit, and specific role for this project in three sentences (maximum).
- Project Summary: Three (3) pages (maximum) addressing the following criteria outlined in Step 3: Build Your Application in the NOFO.
 - Project Summary
 - Project Narrative
 - Strategies and Activities

Questions: Contact Notre Dame Research Limited Submissions at limited@nd.edu.

Unless otherwise noted, all internal applications are due by 11:59 PM Eastern Time on the internal expression of interest deadline.

Internal applications submitted after the deadline will not be accepted.
